

INFINITY Site Manager Software

Infinity Site Managing Software is made up of 5 modules

These Modules are run on an Infinity Server located on each site.

iSite → This module interfaces with the Site Controller at your sites. It monitors transactions and site status. Currently supports GASBOY Site II & III with limited interface to Petrovend Systems.

iTank → This module interfaces with the Tank Gauge at your sites. It monitors inventories, deliveries and site conditions. It can report via email and or pager / phone about site status changes. It can email specific people reports like delivery, inventory and compliance reports. Currently supports Veeder Root 250, 350, Incon, and any tank gauge that uses the Veeder Root communication protocol.

iFleet → This module is used when you have both iSite and iTank. It allows you to monitor inventories quickly using the stop light feature of green means tanks are full, yellow means a delivery is needed, and red means you are almost empty.

iWatch → Camera Option allows people using iSite to link pictures and video to transactions and events like pumps going down. This device even allows you to remotely view real time images over the Internet. The DVR option allows playback motion from a digital recorded history while the Axis version only allows current live feeds.

iTran → This module is currently only supported by CFN. It gives you the option of secure 3 to 6 second authorization over the Internet. It reduces CFN's communication cost and decreases authorization times. This is currently supported on GASBOY and CCIS systems.

Infinity iTran LAN Server → CCIS customers that have all sites on an internal network via frame would be able to purchase the *Infinity* iTran LAN Server to pass all transactions to CFN via a secure connection. With this option the companies can only participate in iTran. All other modules require an *Infinity* Server located on each site.

***INFINITY* Site Manager Software**

Infinity Server \$1750.00 per site (required for Infinity Services)

Infinity Server consists of PC, Linux OS, cables, and *Infinity* Software.

* Monitor, Keyboard, and Mouse Sold Separately.

***Infinity* Modules**

Infinity modules iSite and iTank are purchased based on the first module being \$50.00 per month per site and the second module being \$25.00 per month per site. iFleet is included when both modules are purchased.

Infinity iTran is paid to CFN on a \$55.00 per site per month. Replaces the \$125.00 a month VSat fee or the \$35.00 a month plus \$0.0435 a transaction for dialup.

iWatch (DVR Camera Option) \$1750.00 (4 cameras) to \$2500.00 (8 cameras)
Infinity interface software is already installed on *Infinity* Server.

Infinity iTran LAN Server \$1800.00 (CCIS only) used only on a CCIS network where all sites are networked back to a central location

Infinity iTran G-Site/ Ruby Server \$1250.00 per site

Volume Rebate Pricing

Description	List Price	6 to 12 systems	13 to 19 systems	20+ systems
Infinity Site Manager System (PC, Monitor, Keyboards, cables and Software)*	\$1,750.00	\$ 1,575.00	\$ 1,487.50	\$ 1,400.00
DVR Camera Systems (4 port)*	\$1,750.00	\$ 1,575.00	\$ 1,487.50	\$ 1,400.00
DVR Camera Systems (8 port)*	\$2,500.00	\$ 2,250.00	\$ 2,125.00	\$ 2,000.00
DVR Camera Systems (12 port)*	\$3,200.00	\$ 2,880.00	\$ 2,720.00	\$ 2,560.00
Monthly iSite Fees**	\$ 50.00	\$ 45.00	\$ 42.50	\$ 40.00
Monthly iTank Fees**	\$ 25.00	\$ 22.50	\$ 21.25	\$ 20.00

* This figures do not include shipping

** The first module is \$50.00 and the second is \$25.00 no matter if you only purchase iSite or iTank)

*** Also remember that iTran is paid to CFN at \$55.00 a month but eliminates the \$35.00 CFN Gasboy port fee and \$0.0435 per transaction fee or the \$125.00 per month VSAT fee
